Distributor Support G/R Sales  
 FP-EPA

Contractor shall provide distribution of products from distributor warehouse to Guard/Reserve sale locations IAW the Statement of Work. Distributor must maintain agreements with major US food manufacturers for warehousing and distribution of their products sold in DeCA commissaries.

Period of Performance: March 27, 2014 through February 28, 2015

Delivery orders will be issued upon receipt of a priced trailer worksheet request in accordance with the incorporated contract price schedule.

Fuel Price Adjustments will be authorized once every six months based on the average price of diesel fuel per gallon for the previous six month period. Adjustments may be made up or down when the difference exceeds 10%.

The following website will be used to determine the average price per gallon:  
<http://www.eia.gov/petroleum/gasdiesel/>

Full History spreadsheet (Monthly Diesel All Types) will be used to determine the average for the previous six months. Adjustments will be made at the beginning of September and March.

Current U.S. On-Highway Diesel Fuel Prices rate as of 2/24/14 is \$4.017 per gallon. This will be the baseline cost per gallon. Once an adjustment is made, that average cost per gallon will become the new baseline.

The price adjustment will be incorporated in the quoted cost per mile.

EXAMPLE: Baseline price per gallon: \$4.017 - New Avg price per gallon: \$4.4187 (4.4187 - 4.017 = .4017) + 1.91 (quoted cost per mile) = \$2.31 (rounded two decimals) will be the new cost per mile. The fuel adjustment may be increased or decreased when there is at least a 10% change in the average diesel fuel price.
